Issue: Published Copy

- 3.3.2 Should the need arise to stop any practice, RED LIGHTS will be switched on at the Start Line and RED FLAGS will be displayed at the Start Line and at all other Marshal signalling points around the circuit. This is the signal for all drivers to cease circulating at racing speeds, to slow to a safe and reasonable pace and return to the pit lane unless directed by officials, not to do so.
- 3.4 QUALIFICATION: Each driver should complete a minimum of 3 laps practice in the car to be raced and in the correct session in order to qualify for selection and order of precedence as set out in the MSA regulations [Q4.5]. - 3.6.2 During the race, a mandatory pit stop must take place, between 20 and 40 minutes of the overall race time, under the responsibility of the team manager. A 'Pit Lane Open' warning sign will be displayed on the start/finish line for the duration of the Pit Lane Open period. The pit stop will be of a controlled minimum duration of 2 minutes. Timing for the pit stop begins when the car triggers the timing loop at the pit lane entry. The stop is considered to be complete when the car triggers the timing loop at the pit lane exit. These points will be indicated by boards in the pit lane indicating the start of the pit lane speed limit and the end of the pit lane speed limit.
- 3.6.3 No work shall be carried out on the car, or driver changes be effected, until the car comes to a complete standstill and the engine is stopped. During driver changes, the outgoing driver must be totally clear of the car and bodywork before the incoming driver enters the car. If the car is a single driver entry, the driver may remain in the car, unless refuelling is taking place. The engine must not be restarted until all work is completed and the driver is seated in the car with all the belts done up correctly. Refuelling will be permitted providing MSA Blue Book regulations (Q) 13.1.1 to 13.1.4 are complied with. The only exception is that closed loop (dry break) refuelling rigs are not permitted. Refuelling must only be carried out at the beginning or end of the pit stop. While refuelling is being carried out, the car must remain on its wheels and no other work carried out on the car.
- 3.6.4 During the pit stop the maximum number of personnel authorised to work on the car is 4, inclusive of driver(s).
- 3.6.5 Only one of the authorised personnel is allowed to assist with the driver change/seat belt securing.
- 3.6.6 If refuelling is to take place, the team must provide a Fire Marshal as per MSA Blue Book regulations (Q) 13.1.2. Additionally, during refuelling, the Fire Marshall is not authorised to touch the car, parts or any equipment, other than the fire extinguisher
- 3.6.7 Tyre changing is only permitted where a puncture occurs or the tyre/tyres are deemed to have a negative impact on safety. In such cases, the tyre or tyres must be immediately submitted to the Championship Scrutineer (or his appointed deputy) for verification of fact. If a tyre is changed without verification of fact being sought and agreed, a time penalty will be added to the cars overall race time (see art. 4 Championship Race Penalties).
- 3.6.7 If a driver does not make their mandatory pit stop, or leaves the pits before the correct minimum duration, the driver will have to perform a stop and go penalty (see art. 4 Championship Race Penalties). If it is impossible for this stop and go to take place during the race, a time penalty will be added to the cars overall race time.
- 3.6.8 The mandatory pit stop requirement shall not apply to double header races of 30 minutes duration each. In such cases 2 driver teams will assign one driver to the full duration of race 1 and the second driver to the full duration of race 2.
- 3.7 **STARTS:**
- 3.7.1 The race start will be in a two by two formation and a Rolling Start.
- 3.7.2 All race start countdowns are to have a minimum elapsed period of 3 minutes from the time all cars are released to form up on the grid to the start of the Green Flag Lap(s) in the formation as specified on the Track Licence for each circuit.
- 3.7.3 The minimum countdown procedures/audible warnings sequence shall be - 1 minute to start of Green Flag/Pace Lap - Start Engines/Clear Grid. 30 seconds-Visible and audible warning for start of Green Flag/Pace Lap.

- 3.7.6 Any drivers unable to start the Green Flag/Pace lap or start are required to indicate their situation as per MSA regulation [Q12.13.2] and any drivers unable to maintain grid positions on the Green Flag Lap to the extent that ALL other cars are ahead of them, may complete the Green Flag Lap but MUST remain at the rear of the last row of the grid but ahead of any cars to be started with a time delay.
- 3.7.7 Excessive weaving to warm-up tyres - using more than 50% of the track width, and falling back in order to accelerate and practice starts, is prohibited.
- 3.7.8 Towards the end of the Formation Lap(s), the Lead Car will leave the circuit after extinguishing its roof lights indicating a start is imminent. The grid will continue at a similar speed on the approach to the startline. At the start of the race all cars should keep in formation and must not overtake until they have crossed the startline after the red start light(s) are extinguished. In the event that the starting light(s) fail the Starter will revert to using the National Flag.
- 3.7.9 Aborted Start  
If the start is aborted prior to the Lead Car pulling off, the Lead Car will not extinguish his roof lights and will continue to lead the field around the circuit for an additional formation lap and a new start will be attempted in accordance with the above.  
If the race start is aborted after the Lead Car has left the circuit the signal to start will not be given, and the start lights will remain at red. When this signal is given, all cars should exercise extreme caution and return slowly round the circuit maintaining their original grid positions stopping on the grid. The race start countdown procedure will then be repeated from the one-minute countdown point. At the discretion of the Clerk of the Course, the race distance may be reduced accordingly.
- 3.8 **RACE STOPS:**
- 3.8.1 Should the need arise to stop any race, RED LIGHTS will be switched on at the Startline and RED FLAGS will be displayed at the Startline and at all Marshals Signalling Points around the circuit. Cars may not enter the Pits unless directed to do so. Work on cars already in the Pits must cease when a race is stopped.
- 3.8.2 Case A – Less than two laps completed by Race leader.  
The Race will be null and void. The race will restart from the original grid positions. Competitors unable to take the restart may be replaced by reserves who will start from the back of the grid in reserve order. Gaps on the grid should not be closed up. The length of the restarted race will
